

Orange wire is for dimmer control/headlight switch.

Will dim display when +12 volts are applied.

This is an optional hook-up and not required.

Red – Battery Power

Black – Ground

White – CAN Hi (goes to our Tan/Black or Dark Blue on OBD-2 port position 6)

Green – CAN Lo (goes to our Tan or White wire on OBD-2 port position 14)

Orange – Optional hook-up for dimmer switch.
