

MPVI3

Built for enthusiasts and professionals – introducing MPVI3 by HP Tuners, the fastest and most sophisticated OBDII interface tool to date.

WHAT'S NEW WITH MPVI3?

Standard with
Pro Feature Set

2X Storage
(from 4GB to 8GB)

Faster Standalone
Data Logging

High-Resolution
Accelerometer

Experience our latest generation OBDII interface tool with even more speed and control, while continuing the premier features of its predecessor, like Bluetooth 5.0, an M8 motorsports-grade screw-on connector, USB-C connectivity (4MB/s), and RGB LEDs.

WHY MPVI3?

- 1 Tune all the toys in your garage or shop.** Tune your tow rig, your weekend racecar, your side-by-side, your daily driver, and any other HP Tuners-supported vehicle – courtesy of our credit-based licensing system.
- 2 All eyes on your data.** Connect your MPVI3 device to VCM Suite, combining the forces of VCM Scanner and VCM Editor, to view all your most important diagnostic and performance data with customizable charts, graphics, tables, gauges, and more.
- 3 Pro is the new standard.** Take advantage of all the Pro Feature Set benefits now standard with MPVI3, like standalone data logging with twice the storage at 8GB.
- 4 Faster Data Logging than ever before.** Just when you thought it couldn't be faster, we beat our own record. Experience even faster data logging with MPVI3.
- 5 The HP Tuners' Ecosystem.** The HP Tuners' calibration and motorsports experience starts with MPVI3. Connect your device to VCM Suite for diagnostics and calibration, TrackAddict and Race Render to capture your track days, **PROLINK+** to seamlessly integrate additional sensors, and more.

THE ONLY TOOL YOU NEED IN YOUR TOOLBOX.

Connect > MPVI3 is an advanced OBDII interface tool, connecting your vehicle's control modules to our VCM Suite software. **Read** > Run complete diagnostics, monitor vehicle performance, read from various vehicle control modules, and more in VCM Suite. **Edit** > Optimize your performance, fuel economy, or whatever your vehicle goals may be in VCM Editor with a multitude of defined parameters. **Write** > When you are ready, license and tune any vehicle currently supported by HP Tuners with the fastest read and write speeds available. **Drive** >>>

VCM SUITE

VCM SCANNER – your feature-rich OBDII scanning & diagnostic software.

View, chart, and log all your diagnostic data in real-time via your vehicle's OBDII diagnostic port—command fans, open/closed loop, gear select, timing, air-fuel ratio, and so much more. Read Diagnostic Trouble Codes (DTCs), experience standalone data logging, and explore a multitude of special functions like Gear/Tire Wizard. Built-in VCM controls are also supported.

VCM EDITOR – your comprehensive vehicle control module calibration software.

Get started by reading your vehicle's different control modules' flash memory and save it as an .HPT file. Adjust a multitude of parameters, like spark, fuel, RPM limits, fan temps and speeds, transmission shift points and pressures, exhaust valve control, speedometer settings, and so many more. Then, write all your changes back to the vehicle using your MPVI3.

MPVI3 and VCM SUITE

	ALL VEHICLES	SUPPORTED VEHICLES
Scan DTCs (check engine light)	✓	✓
View Critical Diagnostic + Emissions Data	✓	✓
Standalone Data logging	✓	✓
Read, Edit, Save, and Write to a vehicle control module	✗	✓ ¹
Gear + Tire Wizard Special Function	✗	✓ ²
Access to other special functions in the VCM	✗	✓ ³
Reset Various Engine and Transmission Adaptives	✗	✓ ³

Disclaimer: Most modern OBDII vehicles that HP Tuners does not currently support will have access to the features listed under "ALL VEHICLES". However, some supported vehicles may or may not require a license to use some functions.

¹These functions require a vehicle license.

²Only some supported vehicles require a license for this function.

³Most supported vehicles do not require a license for this function.

Note: The MPVI3 does not include any pre-loaded tunes or calibrations.
